

# 2<sup>ND</sup> ANNUAL CLINICAL UPDATE FOR THE DENTAL TEAM

## COURSE OVERVIEW:

This is the second year that the College of Dentistry has hosted this special program specifically developed for the entire dental team. Last year's inaugural program was a resounding success. Coinciding with alumni weekend activities, this program débuts a potpourri of short, yet powerful presentations given by faculty experts. The course provides an excellent opportunity for the entire dental team to learn about some of the latest clinical techniques, new technologies, significant research, and trends in oral healthcare. An informal brunch will allow participants the chance to network with colleagues and build new professional relationships.

## LEARNING OBJECTIVES:

Upon completion of this course, participants should be able to:

- Discuss the denture systems currently in use and the advantages of Computer Aided Design / Computer Aided Machining (CAD/CAM) dentures.
- Identify patients who would benefit from socket grafting.
- Discuss how various nonpharmacological methods as well as pharmacological techniques help alleviate anxiety, and nurture a positive dental attitude in infants, children, adolescents, and persons with special health care needs.
- List the key areas of communication that are vital between practitioner and patient.
- Discuss the common clinical features of Sleep Bruxism (SB) and Sleep Disorder Breathing (SDB) and how occlusal splints can affect both conditions.
- Explain the clinical indications for Cone Beam Computed Tomography (CBCT) radiography and the uses of Cone Beam Computed Tomography (CBCT).

**SATURDAY, SEPTEMBER 24, 2016**

**5 HOURS CDE CREDIT**

### LOCATION:

Room 071 Apotex Centre  
(Pharmacy Building)  
750 McDermot Avenue  
Winnipeg, MB  
University of Manitoba

**REGISTRATION: 9:30 AM**

**LECTURE: 9:55 AM – 3:10 PM**
