LOCAL ANESTHETIC TECHNIQUES FOR DENTAL HYGIENISTS

Friday, November 17 to Sunday, November 19, 2017

Hamilton Lecture Theatre D016 & Dental Clinic | College of Dentistry | University of Manitoba
780 Bannatyne Avenue | Winnipeg, Manitoba | R3E 0W2

“The workshop was very organized and educational. The environment was friendly and the instructors were very supportive.”

OVERVIEW

This course prepares dental hygienists to become competent in the administration of both block and infiltration local anesthesia. Emphasis is placed on the mechanisms of pain and a thorough understanding of the pharmacology of drugs used in dentistry and their interactions with the patient's current medical conditions and medications. The course has a self-study component which occurs prior to the three-day workshop. Following a review of information included in the self-study materials, participants will complete a pre-clinical examination which has a passing grade of 70 per cent. During Days 2 and 3, participants will receive over-the-shoulder coaching as they administer local anesthesia on each other. Upon successful completion of the clinical competency examination at the end of the program, participants will be issued a certificate of completion.

This course is recognized by licensing authorities in these provinces:

BC, AB, SK, MB, ON, NS, NB, NL

This program will be of interest to: Dental Hygienists

Prerequisites: Participants must be graduates of an accredited dental hygiene program, hold a current license in their province or state of residence. All registrants must email/fax a copy of their current license, CPR certification, Health Care Provider (HCP CPR Level C) and malpractice insurance to the Program Coordinator in order to participate. Please note: Participants who have at least one year of experience working in the oral cavity may be more successful in this course.

Medical History: During the clinical component of this course, all participants are required to act as patients for their colleagues. In order to do this, registrants must submit a completed medical history form along with proof of prerequisites to the Program Coordinator. Any registrant who is unable to act as a patient for medical reasons must arrange for a suitable patient.

REQUIRED ARMAMENTARIUM (not supplied):

Hemostat
Lab coat or clinical attire
Mouth mirror
Safety glasses
Self-aspirating anesthetic syringe

Course Director:

Diane Girardin, RDH
College of Dentistry
Rady Faculty of Health Sciences

Instructors:

Lorraine Glassford, BA, Dip D.H., RDH
Lila Jorheim-MacInnes, RDH
Kathy Yerex, BSc, RDH
Terri Archibald, RDH
Sheryl Slowshower, BSc, RDH
Lorene Belows, BHEc, RDH

LEARNING OBJECTIVES

Upon successful completion of this course, participants should be able to:

- Discuss pain including its generation, perception, sources and classifications.
- Discuss both traditional and non-traditional methods of pain control.
- Identify the anatomy of the head and neck as it pertains to the administration of anesthetic agents.
- Discuss the significance of the medical history as it relates to the administration of anesthetic agents.
- Describe the pharmacology of dental anesthetics and vasoconstrictors including adverse reaction, side effects and contraindications.
- Administer local anesthesia safely utilizing acceptable infiltration and block anesthetic techniques.
- Identify the landmarks, site depth of penetration and anatomy anesthetized for all injections.

Required Textbooks: Course registrants are expected to complete assigned readings over a recommended six-week self-study period before participating in the clinical component of the course.

1. Pain Management Workshop Manual (Salme Lavigne) 2016
2. Handbook of Local Anesthesia (Stanley Malamed) 6th Edition

Both the textbook and manual are available in the Health Sciences BookStore or may be ordered online at:

University of Manitoba
Health Sciences BookStore (Brodie Centre)
727 McDermot Avenue, Winnipeg, MB
Monday to Friday, 9:00 a.m. to 5:00 p.m.
Saturdays, 11:00 a.m. to 3:00 p.m.
