# RECORDKEEPING ESSENTIALS AND OPIOID PRESCRIBING PROTOCOLS

## SATURDAY, SEPTEMBER 23<sup>RD</sup>, 2017

### COURSE OVERVIEW:

#### Recordkeeping Essentials

The patient record is the single most important document used to manage a patient's oral health. That makes it especially important to create complete records that document enough clinical data to support the diagnosis and treatment plan.

Through this session, you will learn how to assess your current dental record system. We will review comprehensive treatment plans and well-written progress notes that support your patients' recommended care. Patient case scenarios will lead to discussion of how to ensure well-written progress notes and documentation of informed consent. This seminar will also review the components of a comprehensive exam, including the use of current and diagnostic radiographs to assess a patient's oral health status.

#### Opioid Prescribing Protocols

Canada is facing an increase in opioid related overdoses and death\* and prescription opioid medications are no longer considered a low-risk option for relief of moderate-to-severe acute pain. If not prescribed responsibly, they can lead to misuse, abuse, addiction, overdose and death. Prior to prescribing, a dentist must assess a patient's risks of taking an opioid. Guidelines will be introduced to help reduce the number of opioid prescriptions written. Patient case scenarios will facilitate discussion on appropriate opioid prescribing and how to manage a potential pill-seeking patient.

### COURSE OBJECTIVES:

Upon completion of this course, participants should be able to:

- Identify the essential components of the dental patient record
- Recognize the importance of a comprehensive examination incorporating good radiographs
- Develop a well-written progress note
- Accurately document informed consent
- Evaluate the recordkeeping system you currently use
- Recognize current trends of Canada's opioid crisis
- Implement current opioid prescribing protocols into your practice
- Evaluate patient risk factors before prescribing opioids
- Prescribe non-opioid alternatives to manage pain
- Identify pill-seeking patients

**SATURDAY, SEPTEMBER 23, 2017**

**4 HOURS CDE CREDIT**

### LOCATION:

Room 071 Apotex Centre  
(Pharmacy Building)  
750 McDermot Avenue  
Winnipeg, MB  
University of Manitoba

**REGISTRATION: 8:30 AM**

**LECTURE: 9:00 AM – 1:15 PM**

### THIS PROGRAM WILL BE OF INTEREST TO:

Dentists, Dental Hygienists, Dental Assistants/  
Other

### REGISTRATION FEE:

Per session/event price:

Dentist - **\$295 CAD**

Dental Hygienist - **\$135 CAD**

Dental Assistant/Other - **\$95 CAD**

Continental breakfast provided.

### REGISTRATION DEADLINE:

**September 9, 2017**

## AGENDA:

0830 - 0900	Registration
0900 - 1130	Recordkeeping Essentials
1130 - 1145	Break
1145 - 1315	Opioid Prescribing Protocols

## SPEAKER:

### **RICHARD D. NADEAU, DDS, MPH**

Clinical Dental Specialist and Director  
Division of Comprehensive Care, Department of Primary Dental Care University of  
Minnesota School of Dentistry

Dr. Nadeau earned his DDS in 1989, GPR certificate VA Medical Center in 1990 and his Masters of Public Health in 1997.
