

MEDICAL EMERGENCIES IN THE DENTAL OFFICE

INSTRUCTOR:

Rebecca Schindle, MD, FRCPC
Emergency Physician, Health Sciences Centre
CEPD Program Director and Lecturer,
Department of Emergency Medicine,
Rady Faculty of Health Sciences, University of Manitoba

And other faculty members from the Department of
Emergency Medicine

COURSE OVERVIEW:

This case-based, hands-on course will focus on medical emergencies in the dental clinic setting.

Topics will include patient evaluation, crisis resource management skills, and the recognition and management of acute medical situations, including cardiac, respiratory, allergic, neurologic and endocrine emergencies.

Instructors will use structured cases to highlight key learning points and practical tips for dealing with acute medical issues. The case-based learning will be complemented with hands-on skills practice in the dental clinic, designed to help participants become more comfortable with critical skills such as airway management and basic life support. Airway manikins will be used to learn and refine basic and advanced airway management skills (including bag-mask ventilation, laryngoscopy and the approach to the difficult airway).

Participants will also have the opportunity to work together in teams to manage the first 5-10 minutes of a simulated cardiac arrest scenario. This exercise will be followed by a debriefing session that emphasizes the take-home messages from the case. It will also touch on communication and teamwork skills in a crisis.

SATURDAY, OCTOBER 14, 2017

4 HOURS CDE CREDIT

LOCATION:

D112A Alpha Omega
College of Dentistry
780 Bannatyne Avenue
Winnipeg, MB
University of Manitoba

REGISTRATION: 8:30 AM

LECTURE: 9:00AM - 1:15PM

THIS PROGRAM WILL BE OF INTEREST TO:

Dentist, Dental Hygienists, Dental Assistants/ Other
