General or specialist dental practitioners face challenges when making critical decisions on whether treatment of an extensively broken tooth should include endodontic and crown therapy versus performing an extraction followed by implant placement. Both paths have risks and benefits — how should you choose?

During this course, there will be a discussion of the challenges practitioners face, supported by evidence-based literature review, when making these important decisions. We'll also explore answers to questions such as:

- What is the definition of a successful endodontic treatment?
- What is a successful implant restorative treatment?
- Can we compare and contrast the two approaches?
- What are the crucial elements and factors that must be ascertained in the diagnostic phase before any clinical treatment takes place?

Part 1 of the course will thoroughly review diagnosis, treatment planning, protocols and processes necessary for appropriate decision-making with respect to this complex problem.

Part 2 will be a discussion on case presentations using the learned principles from Part I and use of CBCT images as a diagnostic tool in the assessment process and treatment planning phase.

**LEARNING OBJECTIVES**

At the end of the course, participants should be able to:

- Understand the seven guidelines that are an essential and mandatory part of the diagnosis and treatment planning of any implant restoration
- Assess and analyze which teeth are more likely to survive and which teeth should be extracted and restored with implants
- Perform a quick analysis of a single-tooth diagnostic problem to determine if an implant alternative is even feasible
- Have a thorough understanding of diagnostic challenges and be able to present a patient with options of whether to restore or extract
- Perform a complete dental exam of the patient as it relates to endodontic treatment or implant treatment
- Implement a protocol and process for making these diagnostic and treatment planning decisions in their practices
- Recognize the red flags associated with cases that are likely to have problems with a high concomitant failure rate

Continental breakfast and lunch will be provided both days.
GENERAL INFORMATION

REGISTRATION
Register online with AMEX, VISA or MasterCard at cpd-umanitoba.com or call 204-789-3562 to register by phone.

REFUND POLICY
Generally, a registration fee refund may be granted upon written request 14 days prior to the start date of the course; however, an administration fee will be retained. Please refer to each specific event brochure for exact details.

If written or verbal notice of withdrawal is received from a registrant less than fourteen (14) days prior to the date of the event, requests for refunds will be assessed on a case-to-case basis and are at the discretion of the Office of Continuing Competency and Assessment.

CANCELLATION
The University of Manitoba Office reserves the right to cancel or postpone any educational program due to an insufficient number of registrations. The decision to cancel will normally be made at least fourteen (14) days prior to the program date.

Each registrant will be notified by email and provided with a full refund of all registration fees. The University of Manitoba is not liable for any loss, damages or other expenses that such cancellations may cause, including, but not limited to, non-refundable airline fares, hotel penalties or lost income.

DISCLOSURE OF CONFLICTS OF INTEREST
In keeping with accreditation guidelines, instructors participating in our programs are required to disclose to the audience any involvement with industry or other organizations that may potentially influence the presentation of the educational material.

ACCESSIBILITY
The University of Manitoba is committed to accessibility for persons with disabilities. To request accommodations, contact Laura Friesen at Laura.Friesen@umanitoba.ca in advance of your program.

DISCLAIMER
CPD events are for educational purposes only for registered participants. Any unauthorized use, disclosure, distribution, or copying of any or all presentation content, materials, or images is strictly prohibited for all events including in-attendance or livestream lecture and hands-on courses.

The information presented in continuing education courses offered at the University of Manitoba are for educational purposes and not intended to supersede the professional judgment of participants in rendering patient care. Participants are cautioned about the dangers of incorporating techniques and procedures into their practices without adequate clinical experience.

Institutions of dental education have an obligation to disseminate new knowledge and training related to dental practice. Some courses may include controversial materials, philosophies of practice, or commercial references. When a company sponsors a continuing dental education course at the University of Manitoba, this does not imply that the University of Manitoba endorses a particular philosophy, procedure or product.

PROGRAM APPROVAL FOR CONTINUING EDUCATION (PACE)
This course is designed for up to 12 hours of Continuing Dental Education Credits. Rady Faculty of Health Sciences, University of Manitoba Nationally Approved PACE Program Provider for FAGD/MAGD credit. Approval does not imply acceptance by any regulatory authority or AGD endorsement. The current term of approval extends from July 1, 2018 to June 30, 2022.

Provider ID# 214210 AGD Subject Code 610\690 AGD Code PROSTHO\ENDO2019
